For this submission I was inspired by the moodboard 'On cloud 9'. I will present a poncho decorated with cables along the construction increases. The garment is presented in a pale pink shade and worked with mohair to achieve the lovely floaty feeling of being surrounded by clouds. In addition, the poncho works very well as a transitional garment across seasons.

The poncho has a circular shape, it is worked in the round beginning in the neckline. Cables are placed between the construction increases. Every few rounds the increases are worked inside the cable to highlight the effect of them. After the main shape is worked, a picot edging is added.

This project suits perfect for beginners who want to go a little further with the working of cables.

This poncho is worked in a medium yarn weight. The swatch is worked using 4 mm crochet hook and holding together the yarns Camarose Sommeruld (70% Merino wool, 30% cotton) and Casasol Mohair (70% Super Kid Mohair, 20% wool, 10% nylon). This combination achieves both good stitch definition to highlight the cables and fluffiness and light feel thanks to the mohair. To avoid holding two strands together, a good alternative may be Katia Mohair Cotton.
